Veterans Health Administration

About VHA

The Veterans Health Administration (VHA) is the largest integrated health care system in the United States, providing care at 1,255 health care facilities (http://www.va.gov/directory/guide/division_flash.asp?dnum=1), including 170 VA Medical Centers and 1,074 outpatient sites of care of varying complexity (VHA outpatient clinics) to over 9 million Veterans enrolled in the VA health care program.

Where is the Nearest Medical Center or other Health Care Facility?

Use the Facility Locator (http://www.va.gov/directory/guide/division_flash.asp?dnum=1) to find the VA medical facility that will best meet your health care needs using a variety of search methods including using your ZIP code.

Common Medical Center Services

VHA Medical Centers provide a wide range of services including traditional hospital-based services such as surgery, critical care, mental health, orthopedics, pharmacy, radiology and physical therapy.

In addition, most of our medical centers offer additional medical and surgical specialty services including audiology & speech pathology, dermatology, dental, geriatrics, neurology, oncology, podiatry, prosthetics, urology, and vision care. Some medical centers also offer advanced services such as organ transplants and plastic surgery.

Patient Advocates

Available at every medical center, Patient Advocates are highly trained professionals who can help resolve your concerns about any aspect of your health care experience, particularly those concerns that cannot be resolved at the point of care. Patient Advocates listen to any questions, problems, or special needs you have and refer your concerns to the appropriate Medical Center staff for resolution.

VHA Mission

Honor America's Veterans by providing exceptional health care that improves their health and well-being.

VHA Vision

VHA will continue to be the benchmark of excellence and value in health care and benefits by providing exemplary services that are both patient centered and evidence based.

This care will be delivered by engaged, collaborative teams in an integrated environment that supports learning, discovery and continuous improvement.

It will emphasize prevention and population health and contribute to the nation's well-being through education, research and service in National emergencies.

VHA Leadership

The Acting Under Secretary for Health directs a health care system with an annual budget of approximately \$68 billion, overseeing the delivery of care to more than 9 million enrolled Veterans. VA, the nation's largest health care system, employs more than 322,030 full time health care professionals and support staff at 1,255 health care facilities, including 170 VA Medical Centers and 1,074 outpatient sites of care of varying complexity (VHA outpatient clinics).

VHA is the nation's largest provider of graduate medical education and a major contributor to medical and scientific research. More than 73,000 active volunteers, 127,000 health professions trainees, and approximately 15,000 affiliated medical faculty are also an integral part of the VHA community.

VHA Offices and Programs

A number of offices and programs support VHA.

- Administrative & Financial Programs (</health/financial.asp>)

Our Providers

The "Our Providers (<https://www.accesstocare.va.gov/ourproviders/>)" online directory lists the primary licensed independent practice providers who may be a lead, ongoing member of your treatment team at the respective VA medical center. Providers in the following occupations are listed on this website: physicians, dentists, nurse practitioners, clinical nurse specialists, physician assistants, chiropractors, certified registered nurse anesthetists, optometrists, podiatrists, and psychologists.

By using this tool, you will be able to do a search of providers in the occupations listed above based upon your preferences and needs. For each provider, you will see the following: full name; gender; clinical product line to which they are "assigned"; where they received their medical training; and the school from which they received their medical degree. This information will be "refreshed" on a monthly basis. There may be staff who have been hired or who have departed the medical center since the last refresh of information.

For additional information on physicians, we also encourage you to use the "DocInfo" service offered by the

Federation of State Medical Boards (FSMB) at <http://www.docinfo.org> (<http://www.docinfo.org>). The FSMB website is updated monthly and is a public website to provide information related to any physician who is licensed in any US state, territory, or district.

Useful Terms

Healthcare System: In many areas of the country, several medical centers and clinics may work together to offer services to area Veterans as a Healthcare System (HCS) in an effort to provide more efficient care. By sharing services between medical centers, Healthcare Systems allow VHA to provide Veterans easier access to advanced medical care closer to their homes.

Examples of Healthcare Systems include the VA Pittsburgh Healthcare System which serves the Pittsburgh area of Pennsylvania, and the VA Puget Sound Healthcare System which serves the Seattle and Tacoma areas of Washington state.

Community-Based Outpatient Clinic: To make access to health care easier, VHA utilizes Community-Based Outpatient Clinics (CBOC) across the country. These clinics provide the most common outpatient services, including health and wellness visits, without the hassle of visiting a larger medical center. VHA continues to expand the network of CBOCs to include more rural locations, putting access to care closer to home.

Community Living Center: Community Living Centers (CLC) are skilled nursing facilities, often referred to as nursing homes. Veterans with chronic stable conditions such as dementia, those requiring rehabilitation or those who need comfort and care at the end of life are served within one of our Community Living Centers*.

Domiciliary: VHA Domiciliaries* provide a variety of care to Veterans who suffer from a wide range of medical, psychiatric, vocational, educational, or social problems and illnesses in a safe, secure homelike environment.

Vet Center: Vet Centers provide readjustment counseling and outreach services to all Veterans who served in any combat zone. Services are also available for family members dealing with military related issues. VHA operates community based Vet Centers* in all fifty states, the District of Columbia, Guam, Puerto Rico, and the US Virgin Islands.

Veterans Integrated Services Network: The U.S. is divided into 18 Veterans Integrated Service Networks (<http://www2.va.gov/directory/guide/division.asp?dnum=1>), or VISNs — regional systems of care working together to better meet local health care needs and provides greater access to care.
